

Product 6-Pack

Great gear for the woods, fields and waterways

By JJ Reich, Copyright © 2008

Here's the rundown on four hunting and fishing products that you may find useful in the woods, fields and waterways. We did.

NATURE VISION'S PAK SHACK 3

For \$170, the lightweight and collapsible Pak Shack 3 consists of a three-person, oversized fishing chair with a built-in, flip-over shelter. The comfortable fishing chair also has dual beverage/gear holders and carry bag for easy transport.

There are three things I like about the Pak Shack 3. First, it has plenty of interior space for fishing and elec-

tronics. Second, it easily fits into the trunk of a small car. Lastly, it's an affordable way to stay on the ice!

GAMEHIDE'S STORMHIDE JACKET & BIB

For \$199-\$269, Gamehide's "typhoon class" garments are designed with the highest quality materials to keep you

warm and dry in tough conditions. The parka has 15 pockets including a pliers pocket on the chest and fleece-lined

handwarmer pockets.

This set of jacket and bibs are perfect for both icefishing in the coldest elements and open-water fishing in whipping winds. They are durable, comfortable, waterproof, windproof, breathable, and their patented "freedom" sleeves gives you room to move.

SMITH ABRASIVES' CCD4

For \$20, this 3-in-1 sharpening system

consists of two pre-set carbide cutting heads for quick edge sharpening; multi-use ceramic rods to sharpen hooks, straight blades and serrated edges; and a fine 750-grit diamond stone.

I like the fact that this is a 3-in-1 system that can sharpen just about any knife or tool, including serrated blades. The protective lid and its ability to break down into its compact case, makes the sharpener even better.

SCHRADE/UNCLE HENRY FILLET KNIFE

For \$30, the classic Uncle Henry Model 167UH, 12-inch fillet knife features a sharply-honed, plain-edged, 7-inch blade made of high-carbon, flexible stainless steel.

You can't go wrong with a Schrade. The high-quality, genuine leather sheath and handsome staglon handle, which sports solid brass guard and brass bolsters, give this knife some serious class.

SIGHTMARK'S LASER BORE SIGHT

For \$50, this laser bore sight projects a laser beam that indicates where your point-of-impact will be to help speed up the sighting-in process. Models to fit a wide range of rifle calibers and shotgun gauges are available.

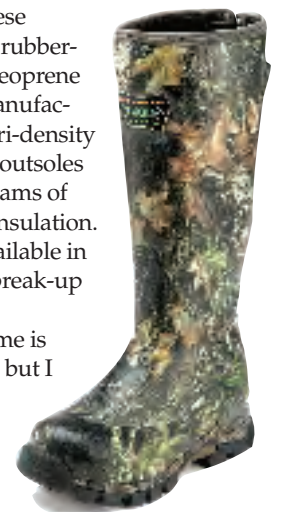

I have a red-dot scope on my turkey gun and this little gadget was a great help when mounting the scope and patterning the load. Plus, I use it for quickly re-checking the alignment of my scope before heading to the turkey woods.

ROCKY'S DEERSTALKER XTREME BOOTS

For \$150, these waterproof, rubber-laminated neoprene boots are manufactured with tri-density lightweight outsoles and 1,400 grams of Thinsulate insulation. They are available in mossy oak break-up camouflage.

The name is DeerStalker, but I love these boots for turkey hunting in the wet months of spring. The boots provide excellent traction, feel light on your feet and very comfortable.
